

# CAPSOIL CLEAR

## SOIL STABILIZER TO PREVENT SOIL EROSION

### DESCRIPTION

CAPSOIL CLEAR is a unique modified polymer based formulation, specially developed to prevent soil erosion, movement of sand dunes, dust control and as a tackifier for hydroseeding.

### FEATURES

The effectiveness of CAPSOIL CLEAR is attributed to the chain length and strength of polymer molecules and its ability to penetrate the substrate and fix sand particles, forming a tough water resistant and resilient continuous film that resists soil erosion by wind attack.

### USES

- To immobilize sand dunes.
- Protecting embankments, highway, pipeline etc.
- Tackifier for hydromulching.
- Dust control on military areas, construction sites etc.
- Highway intersection.

### ADVANTAGES

- Free of toxic solvents.
- Does not contaminate ground water .
- Maximum weatherability to rain, ultraviolet light and wind
- Harmless to both plants and animals.
- Ideally suited for hydroseeding.
- Fast drying; does not leach or wash away.
- Extremely durable.
- Economical.

### TYPICAL PROPERTIES

**Appearance:**  
White liquid

**Specific gravity:**

Approx. 1.0

**Solubility in water:**

Infinitely miscible.

**Toxicity:**

Non toxic.

**Shelf life:**

Minimum 12 months in sealed original containers, under recommended storage conditions.

### DIRECTIONS FOR USE

Level and grade land as per the requirement. Remove debris such as cans, bottles, plastic sheets etc. as these will obstruct spray application. Compaction of soil will improve its ability to bear pedestrian movement, but this step is not essential to soil stabilization and dust control. As far as possible, all construction within the area designed for stabilization should be complete in order to avoid subsequent vehicular traffic disturbing stabilized ground.

**Erosion control / soil stabilization equipment:**

For proper application it is advisable to use hydro mulching or pressure spray equipment from an established equipment manufacturer. The equipment shall have a built-in agitation system and operating capacity sufficient to agitate, suspend and homogeneously mix at one time with long spray bar and suitable spray nozzles.

### APPLICATION

The following are the major factors usually considered when determining the proper application rate for a project:

- Degree of slope.
- Type of soil.
- Degree of compaction of soil surface.
- The types of erosion causing force acting on the area to be treated and their severity.

# CAPSOIL CLEAR

## SOIL STABILIZER TO PREVENT SOIL EROSION

### Guide line for application of CAPSOIL CLEAR

	CAPSOIL CLEAR	Water	Coverage rate; m <sup>2</sup> /ltr.
Soil stabilization and dust control	1 part	3 parts	5-10
Wind and water erosion, control on slopes and embankments	1 part	2 parts	5-10
Landscaping including slopes and embankments.	1 part	3 parts	5-10

### PACKAGING

CAPSOIL CLEAR is supplied in 20 liter pails, 200 liter drums, I.B.C's or in bulk by special arrangement.

### STORAGE

- Store in sealed conventional containers, protected from extreme weather conditions.
- Stir well before use, if stored for a long time.
